# Shihab Haque

## Frontend Developer

shihabhq@yahoo.com │ +880 1928 316192 │ Greenroad, Dhaka-1205

LinkedIn │ Portfolio │ GitHub

## Professional Summary

Frontend developer with expertise in using technologies like React, JavaScript, and Modern UI frameworks. Love to create responsive, modern, and high-performance web applications. Dedicated to lifelong learning and eager to contribute to innovative teams to solve complex problems, expand technical skills, and make a meaningful impact in the tech world.

## Skills and Technologies

- **Frontend:** HTML, CSS, TailwindCSS, Sass, JavaScript, TypeScript,  ReactJS, Redux
- **Backend:** NodeJS, ExpressJS, Mongoose,
- **Database:** MongoDB
- **Tools:** Git, Firebase

## Projects

### Urban Estates │ Case Study │ Live Demo

A real estate management application for users with authentication, image uploads, and payment integration.

- Integrated role-based authentication and Stripe payment system that ensured 100% data safety.
- Optimized image loading by 80% using Cloudinary API.
- Ensured cross-browser compatibility and responsive UI design
- Reduced complexity using 10+ libraries that enhanced app performance.

**Technologies:** React.js, TailwindCSS, Node.js, firebase, Tanstack Query, MongoDB, Mongoose, Stripe

### UrbanEats │ Case Study │ Live Demo

A restaurant management app to buy sell and manage food listings with great UI and secure data handling

- Developed an authentication system using Firebase and JWT authentication for 100% security.
- Designed a modern and responsive Interface with dark/light mode for a great user experience.
- Implemented Axios interceptors and TanStack Query, which reduces redundant API calls by 80%.

**Technologies:** React.js, Tanstack Query, Axios, Firebase, TailwindCSS, Node.js, MongoDB, JWT

### Workflowr │ Case Study │ Live Demo

A Kanban UI-based full stack Drag and Drop productivity management app

- Used Firebase authentication, MongoDB crud operation, and Axios for smooth data handling.
- Integrated Dnd-kit for drag-and-drop interactions that reduces 50% of the reordering lag.

**Technologies:** React.js, Dnd-kit, Axios, TailwindCSS, Firebase, Node.js, MongoDB, Mongoose

## Education

**Bachelor of Business Administration - General**                    2024 - Present
Bangladesh University of Professionals

- CGPA - 3.85/4.00

## Certifications

- Harvard - CS50X
- Programming Hero - Complete Web Development Course

## Languages

- Bengali (Native)
- English (Fluent)
- Hindi (Fluent)
